

FISCHER Spindle Group AG Acquires BBN Spindles SA — A Milestone Reflecting the Value Created Within B-Next Group

A strategic acquisition that confirms the industrial excellence developed under B-Next Group's stewardship and opens new collaborative perspectives for Swiss precision manufacturing.

Bôle, Switzerland – October 2025.

B-Next Group SA announces the acquisition of BBN Spindles SA by FISCHER Spindle Group AG, a global leader in high-precision spindle systems headquartered in Switzerland.

This transaction marks a significant milestone in B-Next Group's industrial journey.

It highlights the Group's capacity to strengthen, develop, and scale high-potential Swiss technology companies, and to position them for long-term success with world-class industrial partners.

A story of industrial value creation

Originally established in 1993, BBN Spindles SA joined B-Next Group in 2018.

Under B-Next's ownership, BBN modernized its organization, strengthened its technological foundation, and expanded its capabilities in small and ultra-precise spindle systems — reaffirming its reputation as a trusted Swiss specialist serving demanding manufacturing sectors.

The acquisition by FISCHER now represents a logical and positive next step in this trajectory, providing BBN with the opportunity to grow even further within an internationally recognized spindle group.

A strategic win-win for both parties

The integration combines FISCHER's global industrial reach and digital expertise with BBN's renowned specialization in compact and highly precise spindles.

At the same time, it demonstrates the ability of B-Next Group to identify, develop, and successfully transfer high-value industrial companies to strong, like-minded partners.

This operation also reinforces the technological links between the ecosystems of FISCHER, BBN, and B-Next, paving the way for continued collaboration in the field of advanced spindle solutions for

next-generation micro-machines, particularly through ENOVEAS, B-Next's sister company dedicated to smart microfactories.

A positive step for Swiss industry

This acquisition reflects the dynamism and complementarity of Switzerland's high-precision industry — where cooperation between specialized and globally active players fuels competitiveness and innovation.

It stands as a symbol of continuity and value creation within the Swiss industrial landscape.

"The acquisition of BBN by FISCHER is both a recognition and an achievement.

It confirms the quality and credibility of the industrial ventures we strengthen within B-Next, while ensuring that BBN continues its development within a world-class organization.

This success also reinforces our collaborative ambitions with FISCHER and BBN — particularly through ENOVEAS and our shared commitment to advancing Swiss precision on the global stage."

— Martin Boeni, Chairman, B-Next Group SA.

About B-Next Group SA

B-Next Group SA is a Swiss industrial group based in Bôle (NE), active in the transformation of the manufacturing landscape through innovative, autonomous, and sustainable production solutions.

By nurturing companies such as ENOVEAS, B-Next accelerates the emergence of a new generation of high-value industrial ventures, combining agility, precision, and responsibility to shape the future of smart manufacturing in Switzerland.
